Working With Words

Numerical Data: $(1,2,3) \rightarrow 4$

Word Data: (Mr., Worldwide, to) → Infinity

Predicting the Next Word In a Song

I don't want a lot for Christmas

There is just one thing I need

I don't care about the presents underneath the Christmas tree

I just want you for my own

More than you could ever know

Make my wish come true

All I want for Christmas is you

I don't want a lot for Christmas

There is just one thing I need

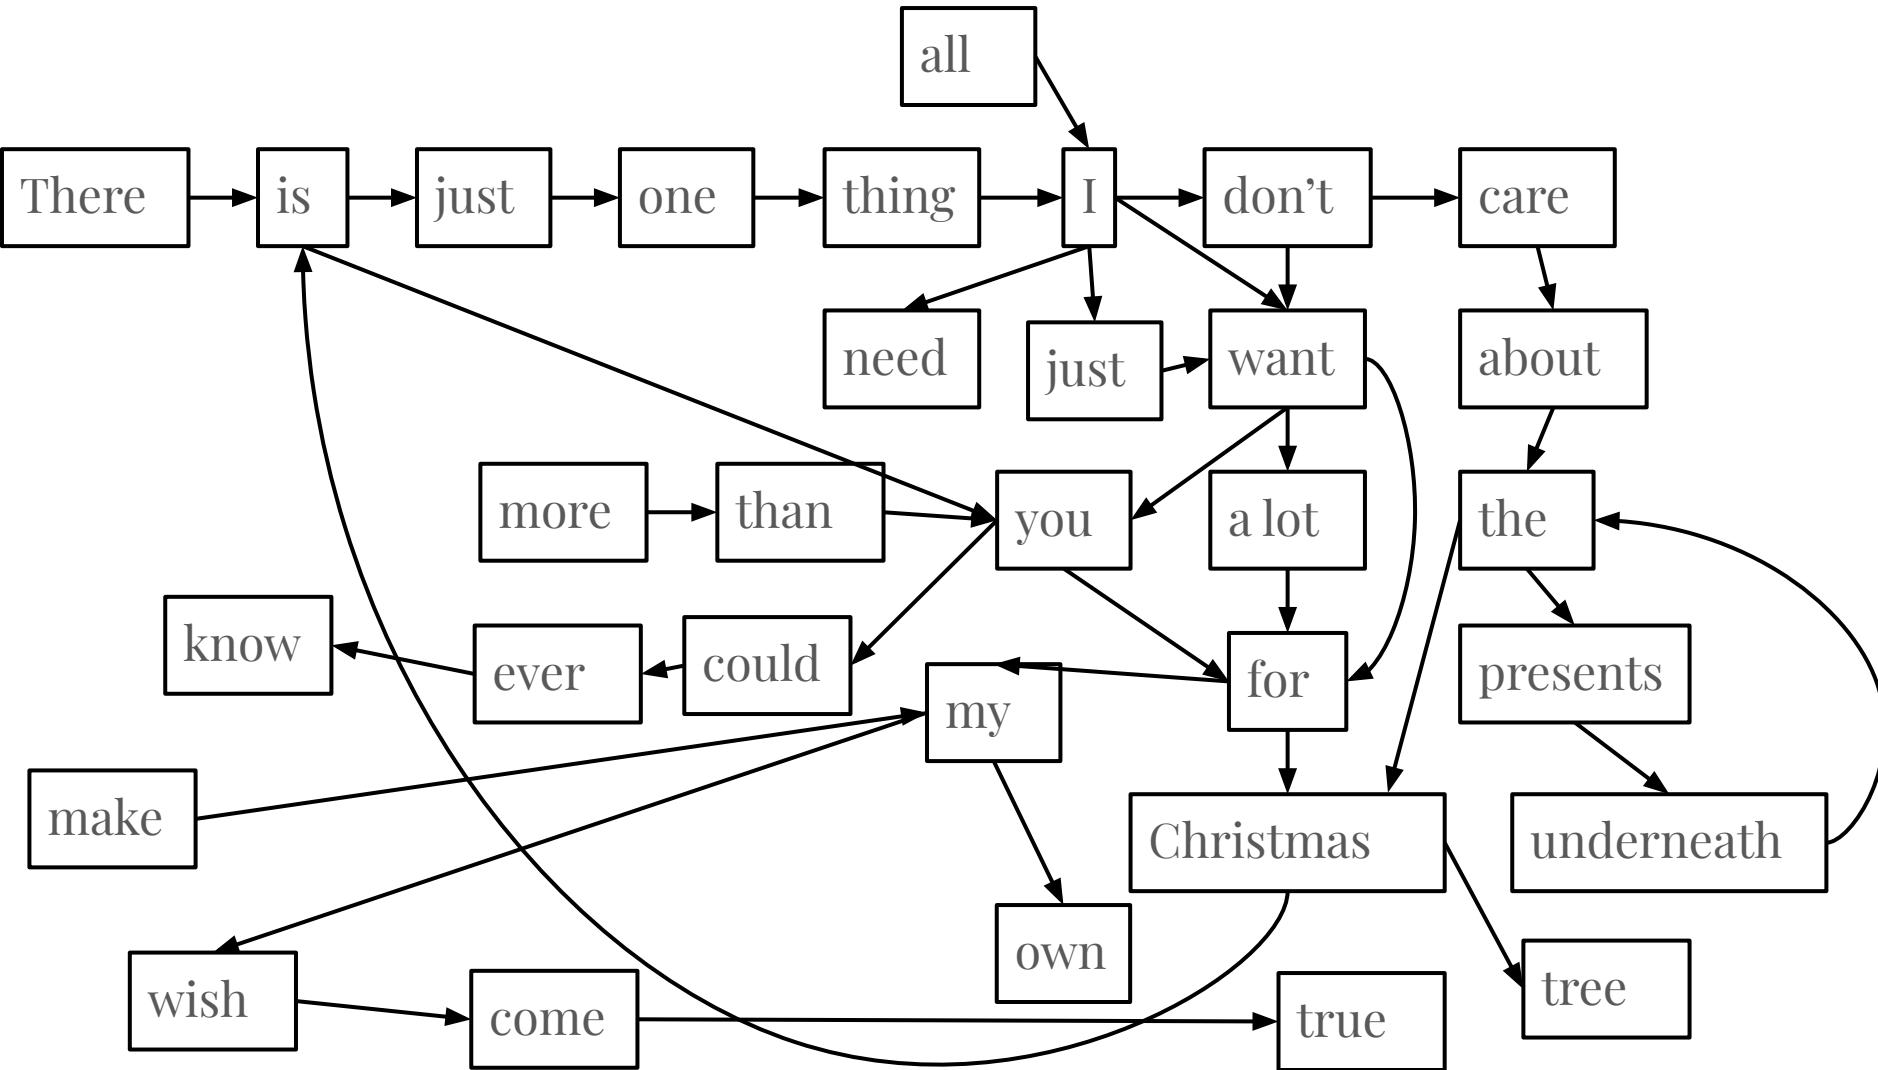

I don't care about the presents underneath the Christmas tree

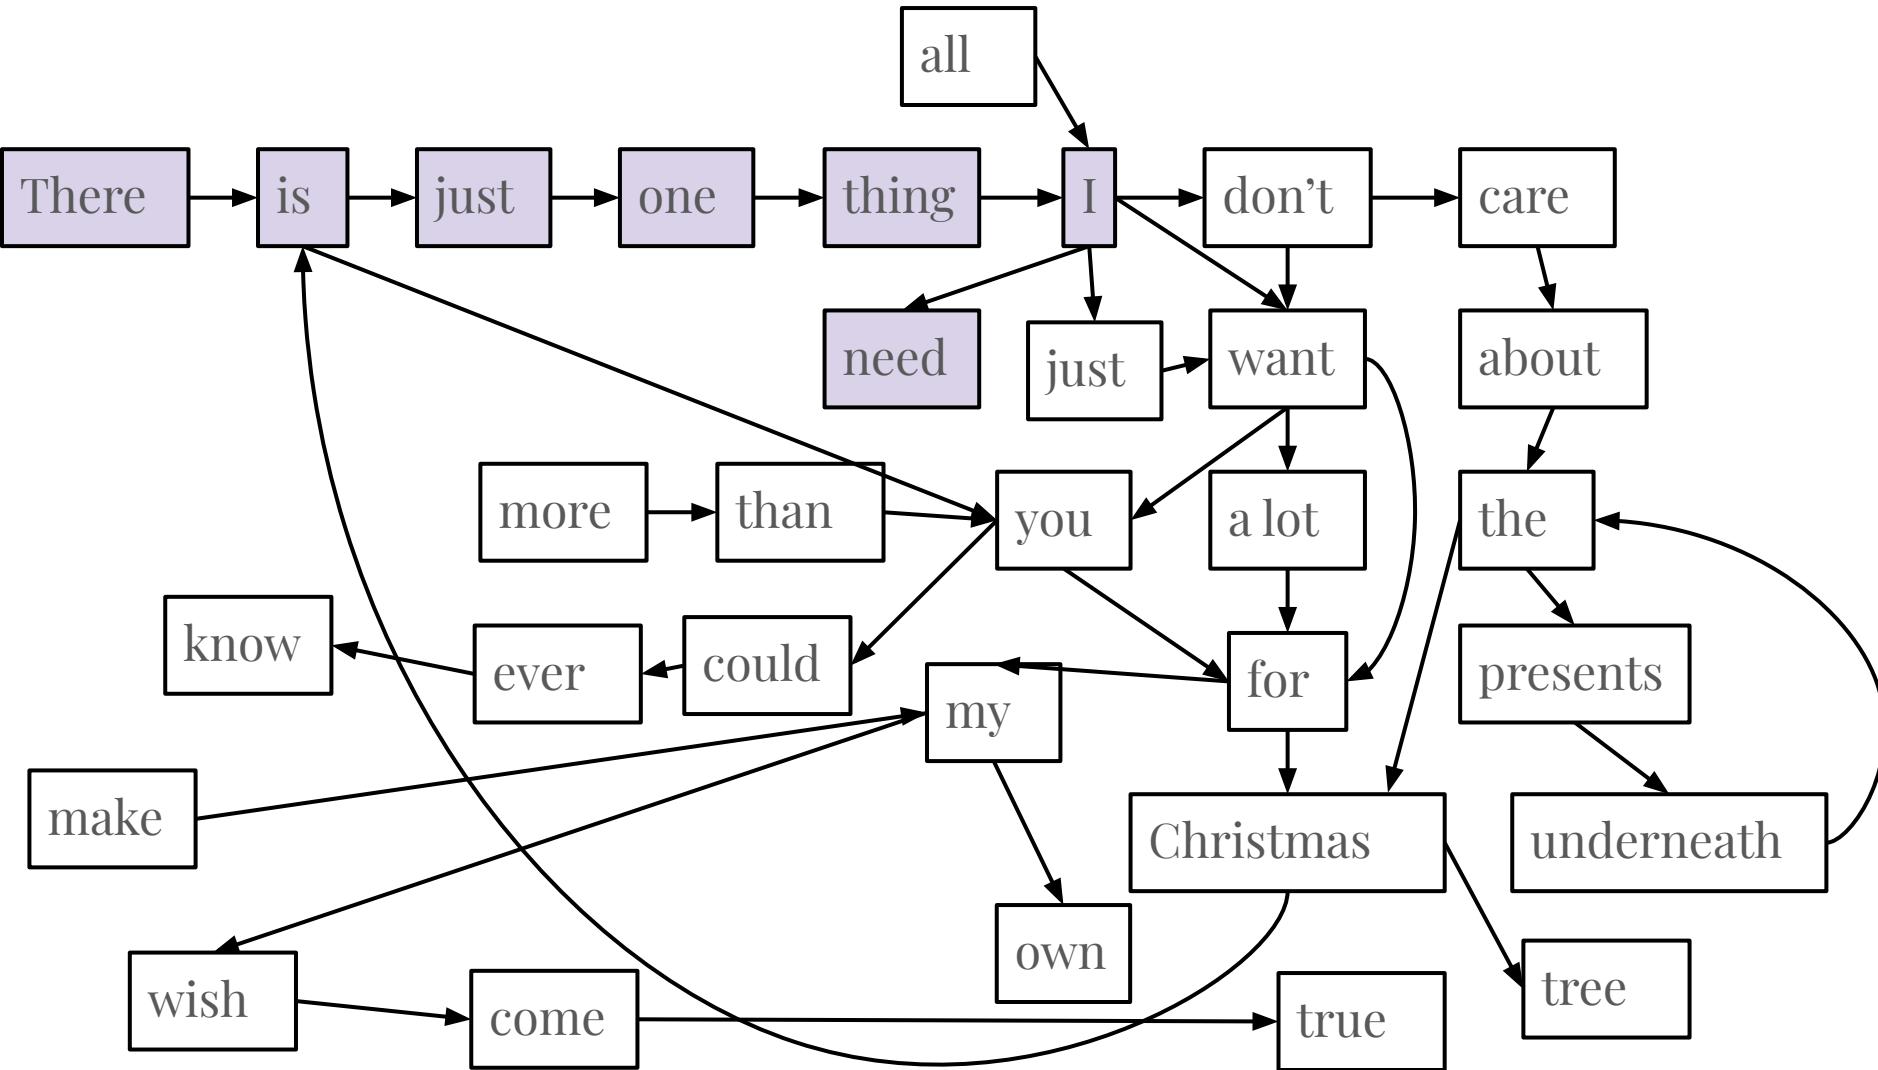

I just want you for my own

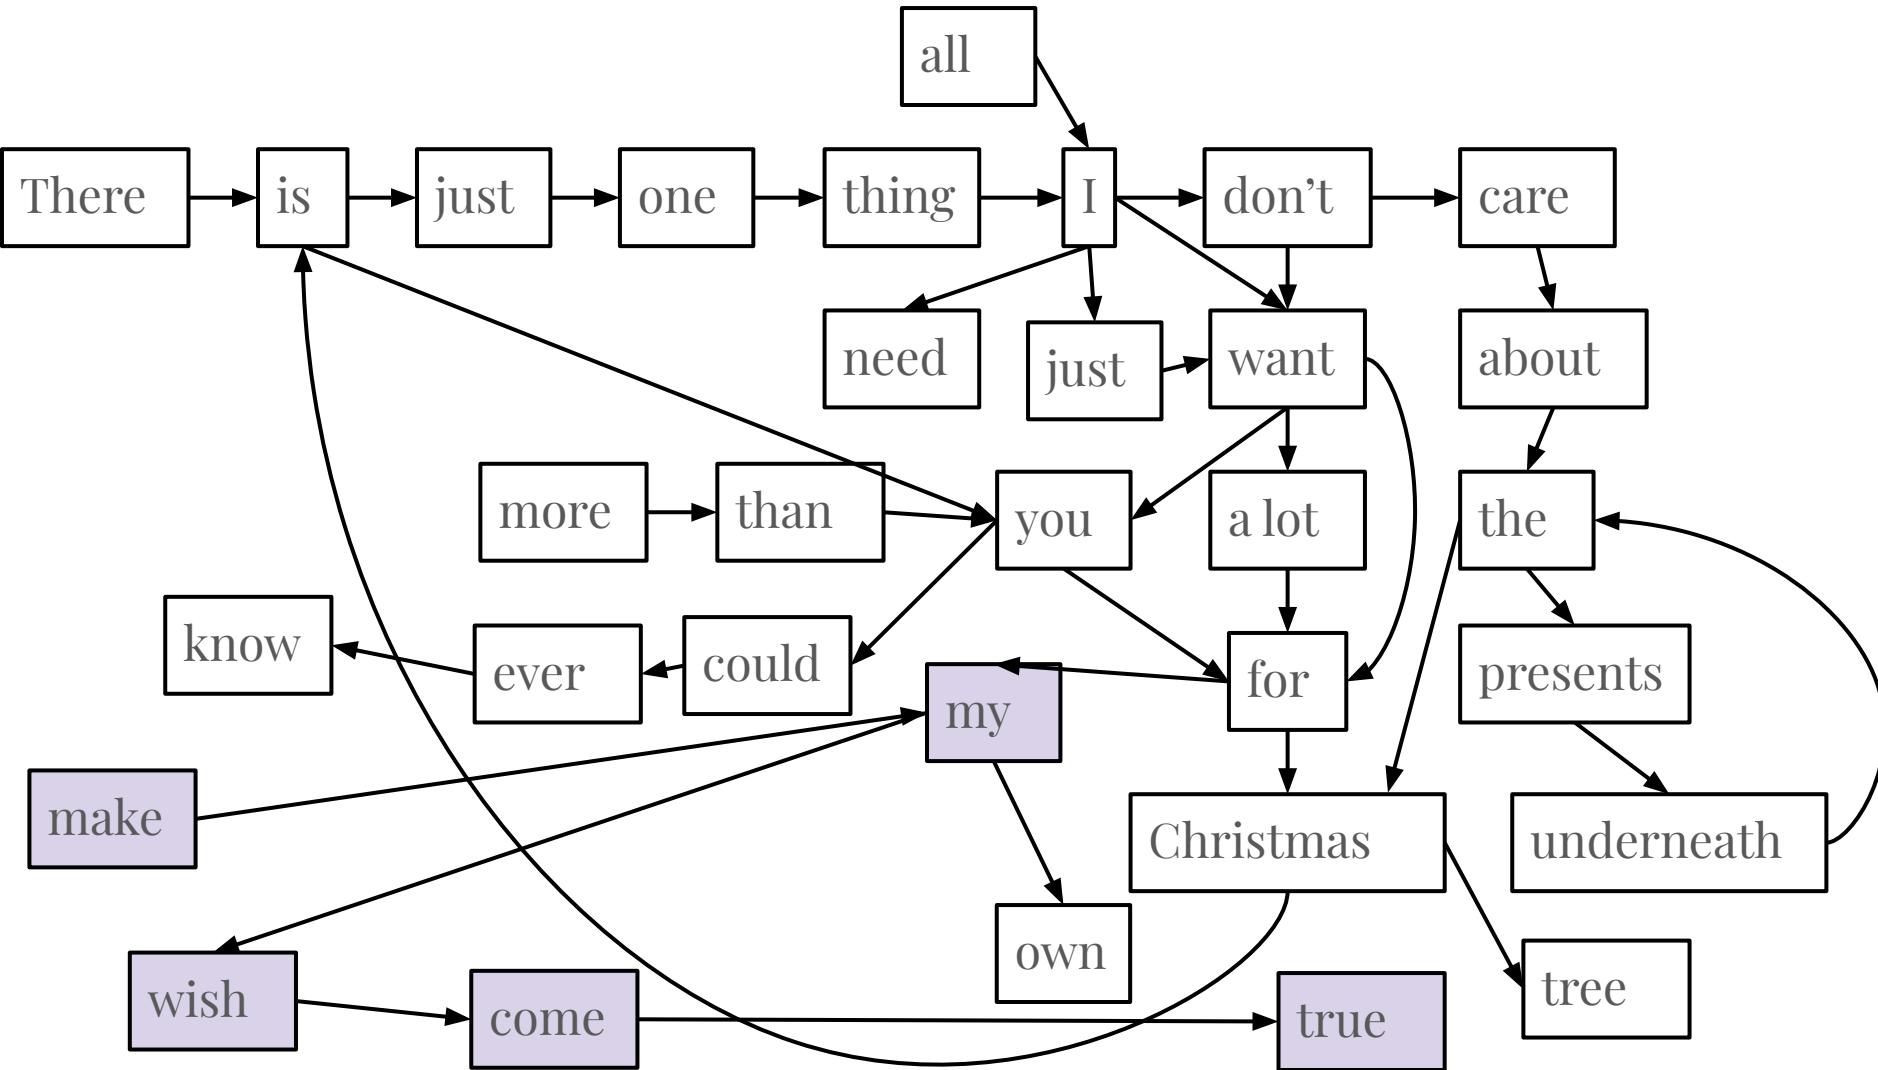

More than you could ever know

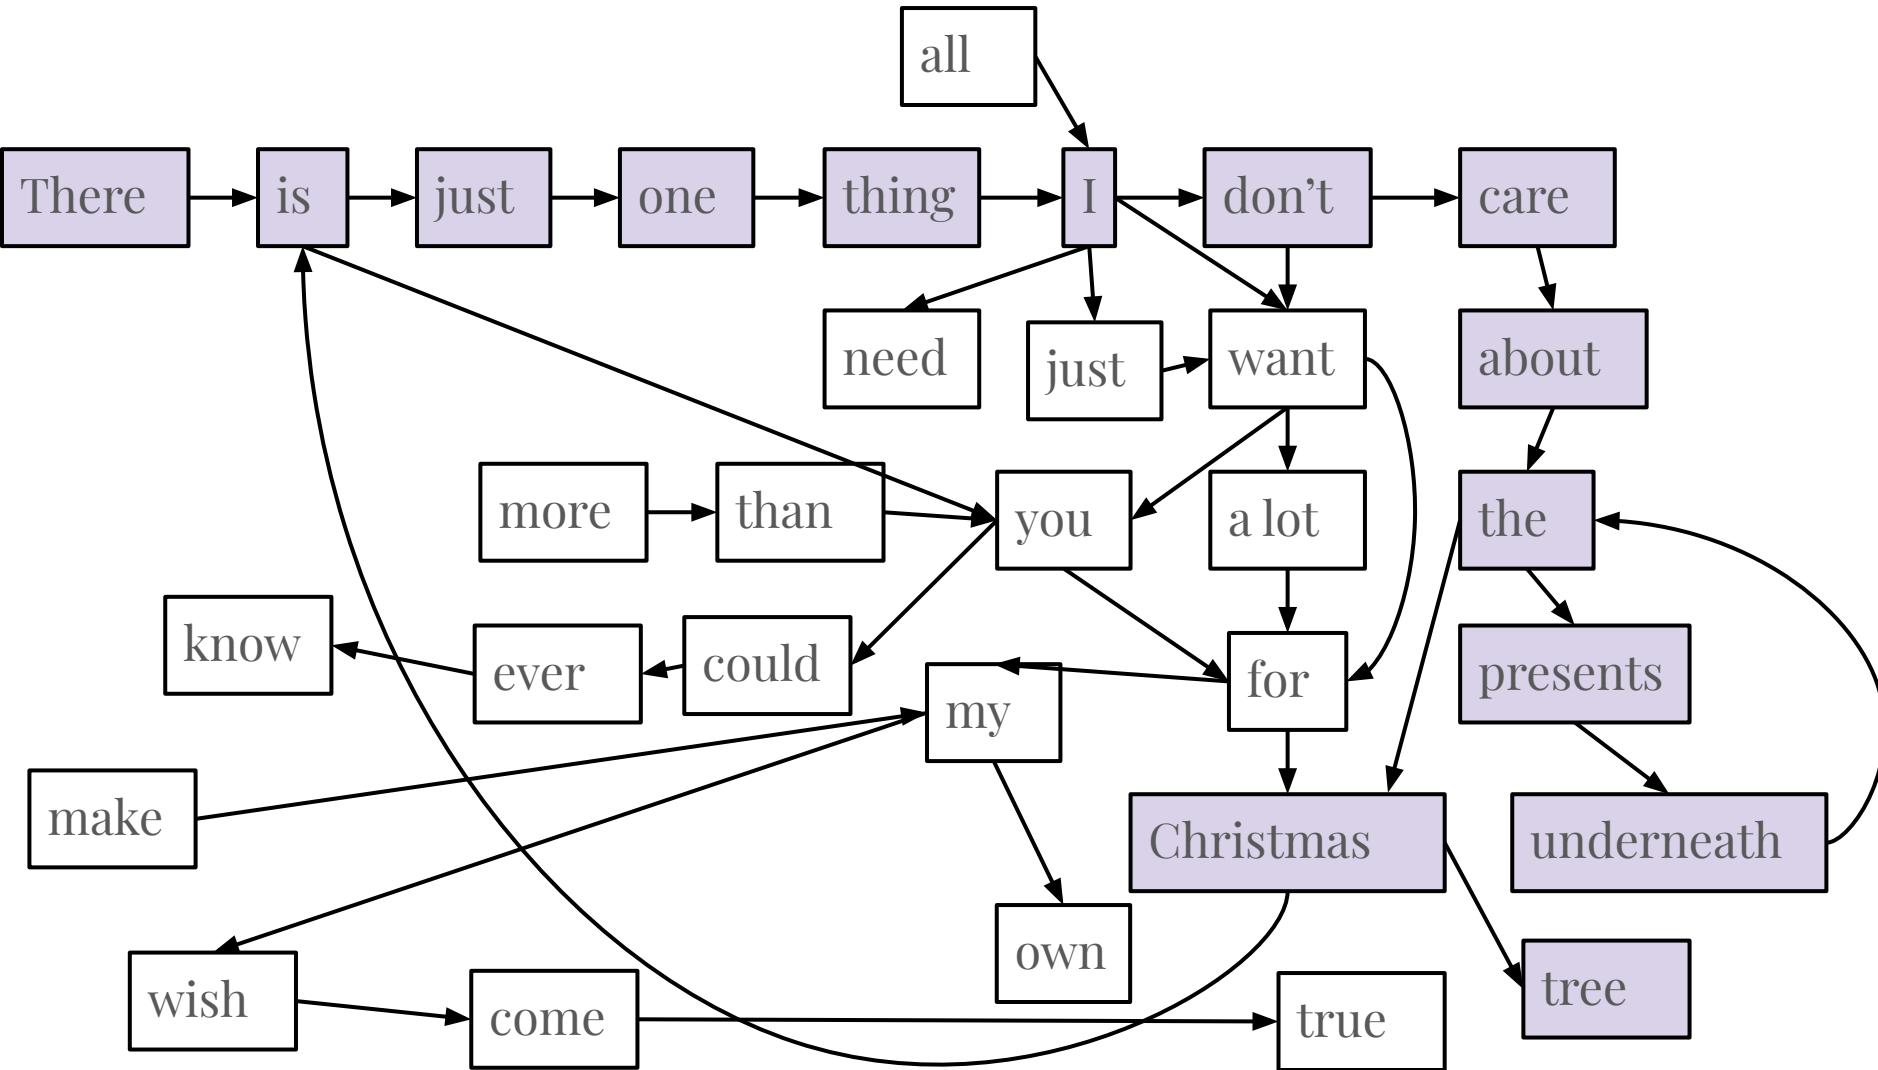

Make my wish come true

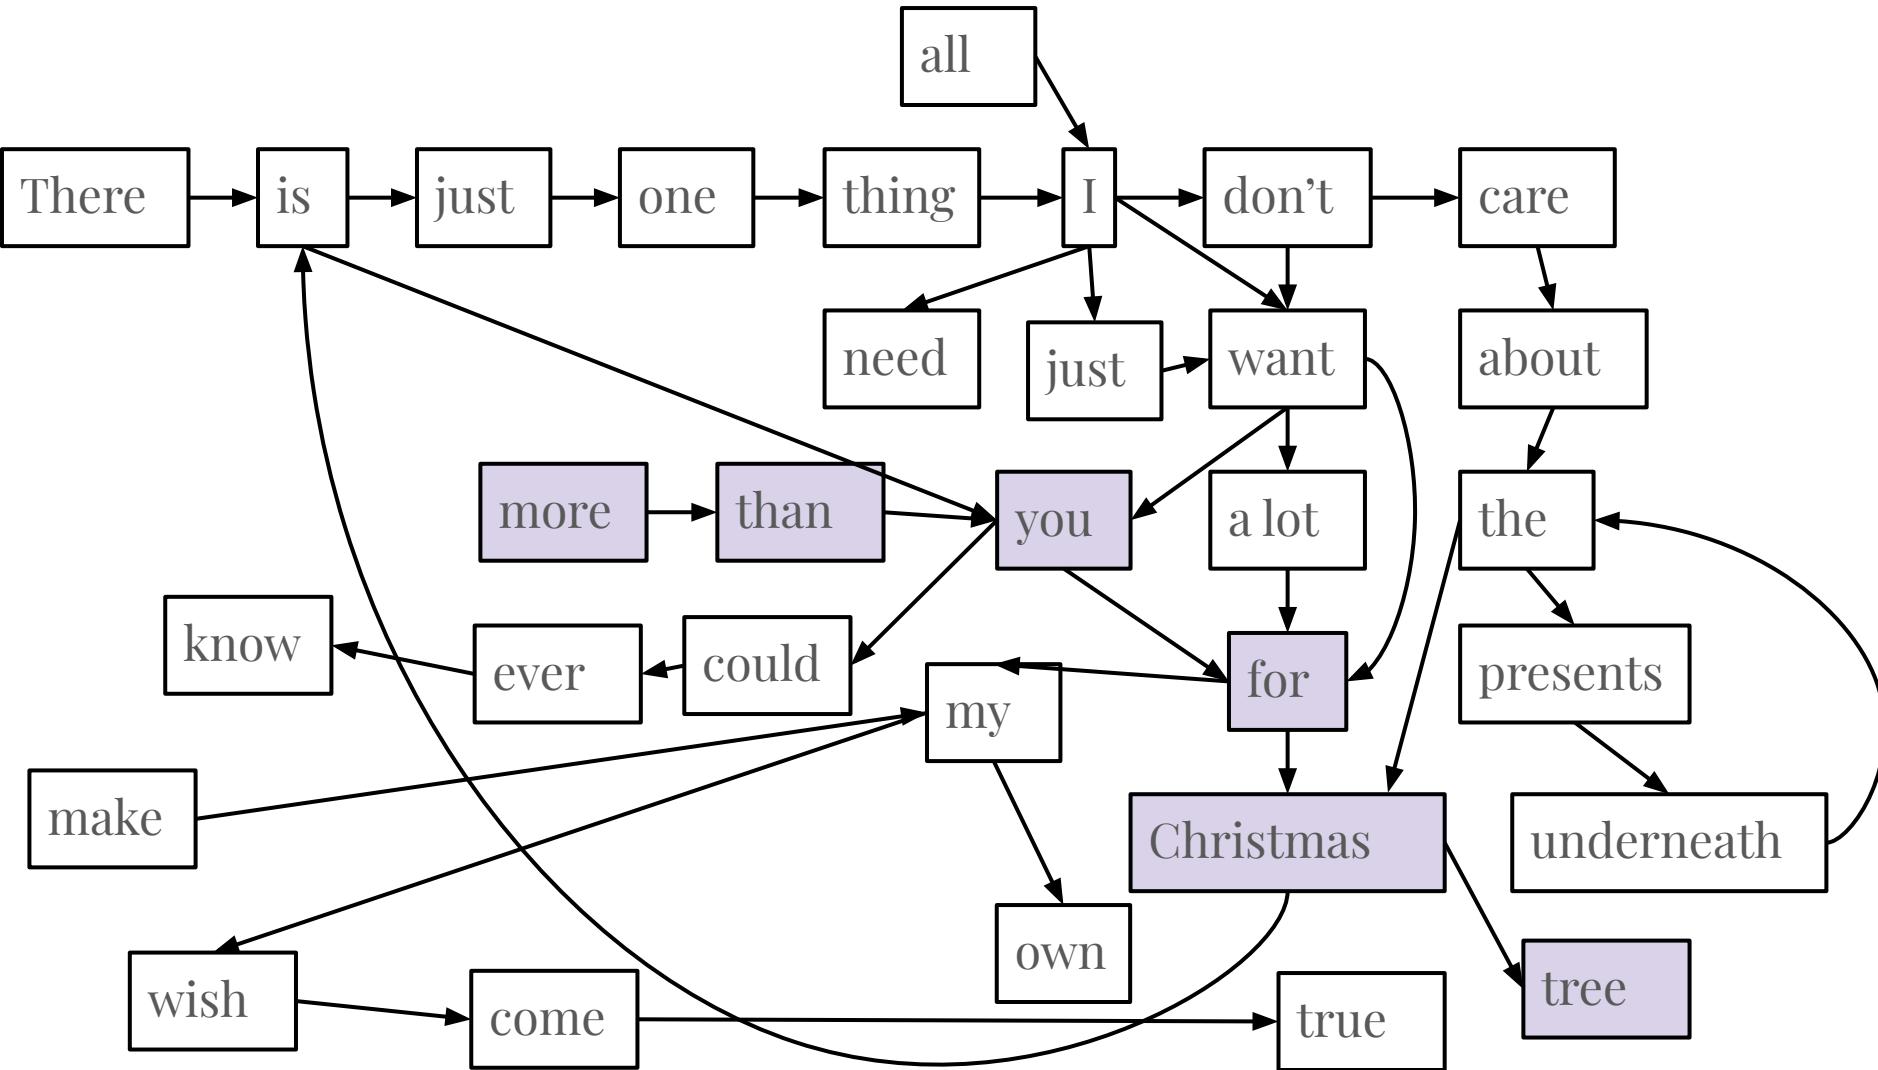

All I want for Christmas is you

I don't want a lot for Christmas

There is just one thing I need

I don't care about the presents underneath the Christmas tree

I just want you for my own

More than you could ever know

Make my wish come true

All I want for Christmas is you

I don't want a lot for Christmas

There is just one thing I need

I don't care about the presents underneath the Christmas tree

I just want you for my own

More than you could ever know

Make my wish come true

All I want for Christmas is you

I don't want a lot for Christmas

There is just one thing I need

I don't care about the presents underneath the Christmas tree

I just want you for my own

More than you could ever know

Make my wish come true

All I want for Christmas is you

I don't want a lot for Christmas

There is just one thing I need

I don't care about the presents underneath the Christmas tree

I just want you for my own

More than you could ever know

Make my wish come true

All I want for Christmas is you

Attention Networks

Attention Networks

- To properly interpret and produce intelligible sentences, you need to consider variable sequence lengths
 - Not something a normal neural network is capable of doing
- Solution: Attention networks!

Attention Is All You Need

Transformer Networks

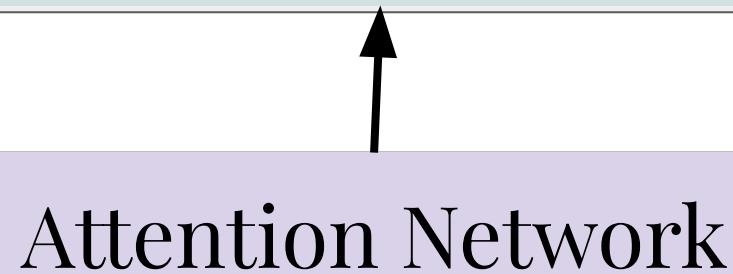

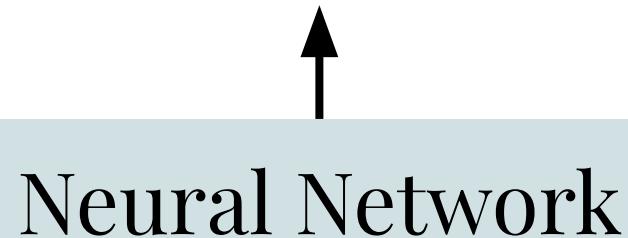

Simple Recurrent Neural Network

Preprocessing of data has been used throughout the course

Transformer Network: Attention network creates the connections, neural network finds the patterns

Semantics

Syntax

ChatGTP-3

- 96 Transformers
 - Hundreds of billions of parameters
- Trained with the entire internet and all openly available books
 - Trillions of training points
- Trains in 355 years on a single GPU
 - Trains in a month with thousands of GPUs
